DEVELOPMENT IMPACT FEE STUDY - 2016 Update FINAL REPORT

Chapter 1

Development Impact Fee Analysis

Introduction

This report is the second update to the *2007 Development Impact Fee Study* (RBF Consulting, July 20, 2007). The first update was prepared in 2011, *Development Impact Fee Study – 2010 Update* (RBF Consulting, April 25, 2011). The 2007 report presented an update of the analysis of the need for facilities to accommodate new development in the City of Marina and addressed five City development impact fee programs: Public Building Facilities, Public Safety Facilities, Roadways, Intersections and Park Facilities. The City currently imposes development impact fees on new development for all five of these programs. The City of Marina recently completed an update of their Capital Improvement Program (CIP) and it is currently being adopted.

The purpose of the Development Impact Fee Study – 2016 Update is to re-evaluate and update the fees developed from the 2011 study to incorporate the adopted CIP projects and additional recommended projects.

Study Objectives

The City of Marina is a rapidly growing community with planned development in several areas of the City, most notably the 1500 acres of former Fort Ord, which will be developed over the next 15-20 years. In order to provide adequate public facilities, the City must update the development impact fee on a regular basis. This study updates five of the City's development impact fees, which are described in more detail in the following chapters.

This report does not address all fees that will be required from developers for improvements not included in the Fee Program. Fees such as those associated with schools, The Fort Ord Reuse Authority (FORA), farmland preservation, or habitat conservation plans, are outside the scope of this project and have separate development fee agreements with the City of Marina. Development associated with California State University – Monterey Bay (CSUMB) is excluded from the Fee Program due to the peremptory writ of mandate issued by the California Superior Court (see copy of writ in Appendix A and additional discussion in Fee Area section at the end of this chapter).

The *Regional Impact Fee Nexus Study Update* (Transportation Agency for Monterey County, March 26, 2008) identified funding for the following project on the City's CIP list: widening of Imjin Parkway from Reservation Road to Imjin Road.

DEVELOPMENT IMPACT FEE STUDY - 2016 Update FINAL REPORT

Mitigation Fee Act

Over the last 30 years, the changing fiscal situation in California has steadily under-funded local infrastructure. Accordingly, many cities have adopted a policy of “growth pays its own way,” requiring new development to fund infrastructure expansion through the imposition of public facilities fees, also known as development impact fees.

As a result of the widespread imposition of public facilities fees at the local level, the State Legislature passed the *Mitigation Fee Act* (Assembly Bill 1600) in 1988. The *Act*, contained in *California Government Code* Section 66000 *et seq.*, established ground rules for the imposition and administration of impact fee programs. The *Act* became law in January 1989 and requires local governments to document the following when adopting an impact fee:

1. Identify the purpose of the fee;
2. Identify the use of fee revenues;
3. Determine a reasonable relationship between the use of the fee and the type of development paying the fee;
4. Determine a reasonable relationship between the need for the fee and the type of development paying the fee; and
5. Determine a reasonable relationship between the amount of the fee and the cost of the facility attributable to development paying the fee.

In summary, a fee cannot be more than the cost of the public facility needed to accommodate the new development paying the fee, and the fee revenues can only be used for their intended purpose.

Organization of the Report

The first step in determining an impact fee begins with the selection of a planning horizon and the identification of projects needed to support the projected population and employment. These projections are used throughout the analysis of various facility categories.

Chapters 2 through 5 are devoted to documenting the following fees:

- Chapter 2 - Public Building Facilities Impact Fee - city hall, public works, and community center facilities
- Chapter 3 - Public Safety Facilities Impact Fee - police and fire facilities
- Chapter 4 - Transportation (Roadways & Intersections) Facilities Impact Fees
- Chapter 5 - Parks Facilities Impact Fee

Each chapter is organized under the following sections to clearly document the requirements of the *Mitigation Fee Act* discussed above:

DEVELOPMENT IMPACT FEE STUDY - 2016 Update FINAL REPORT

- The chapter begins with a statement identifying the purpose of the fee by stating the types of facilities that would be funded.
- The *Service Population* section identifies whether only residents or both residents and businesses benefit from the facilities in the associated category. It identifies the appropriate population figures to use in the analysis, and also accounts for anticipated populations from those developments that have existing development agreements (DA's) with the City. For transportation facilities, the *Trip Generation* section defines the benefit relationship on the basis of daily vehicle trips rather than on service population.
- The *Facility Standards and Fee Schedule* section establishes a reasonable relationship between the need for the fee and type of development paying the fee. This section also establishes a reasonable relationship between the amount of the fee and the cost of the facility attributable to development paying the fee. Using a common factor for facility costs per capita or level of service, the schedule ensures that each development project pays its fair share of total facility costs. For Transportation facilities, the *Proportionate Share and Fee Schedule* section defines the relationship based on land use types.
- The *Facility Costs to Accommodate Growth* section establishes a reasonable relationship between the use of the fee revenues and the type of development paying the fee. This section also estimates the total facility costs associated with new development over the planning horizon. These costs equal the revenues that would be collected through the impact fee. Programming of revenues to specific projects would be done through the City's annual capital improvement planning and budget process.
- The *Implementation* section provides recommendations for the ongoing administration of the fee. The recommendations are meant to ensure compliance with the *Act*, and to ensure that fees are adjusted for inflation.

Fee Area

The areas of the City to which the fees will apply are shown in **Figure A**. This area includes the current City of Marina General Plan Boundary. The fee area includes the following approved and pending projects:

- Airport Business Park
- Airport EDC Parcel
- California State University Monterey Bay Campus expansion
- Downtown Redevelopment Plan
- The Dunes
- Imjin Office Park (remaining phases)
- K-8 School, Marina High, Marina Joint Use Facility
- Marina Station
- Marina Heights

DEVELOPMENT IMPACT FEE STUDY - 2016 Update FINAL REPORT

- MPC Satellite Campus Phase II
- MBEST

The fee area is anticipated to develop through the year 2020 and beyond. The Marina Heights and Dunes projects have separate Development Agreements with the City for payment of fees. Their contributions are thus subtracted from the total cost of establishing a nexus, and the remainder of the cost is divided between the new General Plan buildout projects.

As stated in the September 14, 2009 Peremptory Writ of Mandate from California Superior Court (a copy of Writ is included in Appendix A), California State University-Monterey Bay was directed by the CSU Trustees to take all measures to ensure that the campus trip counts do not exceed the mitigation threshold of 4,361 additional trips over the baseline traffic level. If the CSUMB trips near this mitigation threshold, CSUMB would be required to increase transportation demand management measures or limit development. In the event that CSUMB trips exceed the mitigation threshold of 4,361 trips, further environmental review will be required. CSUMB will be required to adopt a TDM plan to reduce vehicle trips, to seek approval from Trustees to exceed the 4,361 trip threshold, and report to the Chancellor, FORA, and City of Marina any measures or modifications to the TDM plan to address an increase in trip levels. Thus according to the writ, this commitment shall be construed as an enforceable mitigation measure under Public Resources Code §21081.6. Therefore, development associated with CSUMB was excluded from the Impact Fee Program due to the agreement outlined in the writ.

The list of all approved and pending projects included in the fee program are listed in **Table 1.1**.

DEVELOPMENT IMPACT FEE STUDY - 2016 Update FINAL REPORT**Figure A: City of Marina Development Impact Fee Area Map**

DEVELOPMENT IMPACT FEE STUDY - 2016 Update FINAL REPORT

Population Projections

The population estimates for the approved and pending developments were estimated by applying density factors for the number of people per dwelling unit (DU) to each of the residential land uses. The number of workers was estimated using density factors based on the number of building square feet for each worker. The land use, population, and employment estimates are summarized in **Table 1.1**. It is estimated that the growth in the impact fee area will increase the City population by approximately 9,500 people and will generate about 5,500 new jobs.

Development Impact Fees

Table 1.2 presents a summary of the updated development impact fees for the City of Marina in 2015 U.S. Dollars. Chapters 2 through 5 of the report provide a detailed discussion of how these fees were calculated.

The estimated revenue projected with build-out of all approved and pending projects within each fee program is shown in **Table 1.3**.

DEVELOPMENT IMPACT FEE STUDY - 2016 Update FINAL REPORT

Chapter 2

Public Building Facilities

This chapter presents an analysis of the need for public building facilities to accommodate new development in the City of Marina. These public buildings include city hall, public works and community center facilities. A fee is presented based on the cost of these facilities to ensure that new development provides adequate funding to expand these facilities to meet its needs.

Service Population

City Hall and Public works facilities serve both homes and businesses citywide. Consequently, a service population that includes both residents and workers reasonably represents the need for these facilities.

Community center facilities serve primarily residents in the City by providing space for recreation and similar programs. Consequently, a service population that only includes residents and not workers reasonably represents the need for these facilities. As population grows with new development, so does demand for recreation services provided by these facilities.

Table 2.1 shows the estimated future service population for public building facilities for 2020 and beyond. In calculating the service population, workers are weighted less than residents to reflect lower per capita service demand. Nonresidential buildings are typically occupied less intensively than dwelling units, so it is reasonable to assume that average per worker demand for services is less than average per-resident demand. The 0.24-weighting factor for workers is based on a 40-hour workweek divided by a total of 168 hours in a week.

Table 2.1: Public Buildings Facilities Fee – Population Projections

Timeframe	Residents	Workers	Ratio of Workers/ Residents	Equivalent Resident¹	Total Service Population²
Total New Development (Table 1.1)	9,455	5,498	0.24	1,320	10,775
Notes:					
¹ Equivalent resident calculated by multiplying workers by ratio of workers/residents.					
² Total service population includes residents and equivalent residents.					

DEVELOPMENT IMPACT FEE STUDY - 2016 Update FINAL REPORT

Facility Standards and Fee

Per capita facility standards are used in calculating the impact fee to ensure a reasonable relationship exists between new development and the need for new city hall, public works, and community center facilities.

As indicated in the **Appendix B**, the 5-year Capital Improvement Project (CIP) list includes several public facilities buildings (Civic Center, Senior Center, and Dunes PBC Rehab) that will be funded by the impact fee program. The total funded cost for these facilities is presented in **Table 2.2**. As noted in the previous section Dunes and Marina Heights have developer agreements (DA) and will be contributing fees towards the Public Facilities program in addition to the other fee programs. Thus, their anticipated revenues were indexed for inflation (from Year 2010 to 2015 resulting in an average increase of approximately 8.7 percent) and credited against the total funded costs. The resulting balance was allocated to the approved and pending projects in the fee program.

The costs associated with the future City Hall and Public Works facilities were divided by the service population that included both residents and workers (equivalent residents) to obtain a per capita cost. Since the future community facilities will be used by residents only, the costs were divided by the service population that only included residents. The resulting cost per resident of \$1,371.14 was obtained by adding the two costs attributable to residents i.e., costs for City Hall and Public Works facilities (\$328.19) and costs for future community facilities (\$1,042.95) together. The cost per worker is \$78.77 (0.24×328.19).

The cost per capita was then multiplied by the density assumptions to determine a fee for each land use, as shown in **Table 2.3**. It should be noted that the Public Building Facilities fee for the Casino uses is based on the “gaming” area rather than total building space.

Facility Costs to Accommodate Growth

Table 2.4 provides an estimate of the total revenue that will be generated at build-out in 2020 and beyond. The City would maintain a reasonable relationship between new development and the use of fee revenues by funding a variety of projects to expand city hall, public works, and community center facilities during this period.

Implementation

The public buildings impact fee would be collected at the time of building permit issuance. To implement the fee the City should:

- Annually update a capital improvement plan to indicate the specific use of fee revenues for facilities to accommodate growth;
- Comply with the annual and five-year reporting requirements of *Government Code 66000 et seq.*; and

DEVELOPMENT IMPACT FEE STUDY - 2016 Update FINAL REPORT

- Identify appropriate inflation indexes in the fee ordinance and allow an inflation adjustment to the fee annually.

For the inflation indexes, the City should use separate indexes for land and construction costs. Calculating the land cost index may require use of a property appraiser every several years. The construction cost index can be based on the City's recent capital project experience or taken from any reputable source, such as the *Engineering News Record* (ENR).

DEVELOPMENT IMPACT FEE STUDY - 2016 Update FINAL REPORT**Table 2.2: Public Buildings Unit Costs**

Description	Service Population (Capita)	Cost	Cost per Capita
Future City Hall & Public Works Facilities (residents & resident equivalent)			
Amount to be Funded by Impact Fee Program (Civic Center)		\$ 8,200,000	
TIF Fees Paid (02/13/2012 to October 26, 2015) ¹		\$ (57,295)	
Contribution from Dunes Agreement ²		\$ (3,695,230)

DEVELOPMENT IMPACT FEE STUDY - 2016 Update FINAL REPORT

Chapter 3

Public Safety Facilities

This chapter presents an analysis of the need for public safety facilities to accommodate new development in the City of Marina. A fee schedule is presented based on the cost of these facilities to ensure that new development provides adequate funding to meet its needs.

Service Population

Public safety facilities serve both homes and businesses citywide. Consequently, a service population that includes both residents and workers reasonably represents the need for these facilities.

Table 3.1 shows the estimated service population for public safety facilities for 2020 and beyond. In calculating the service population, workers are weighted less than residents to reflect lower per capita service demand. The 0.50-weighting factor for workers is based the estimated number of service calls per employee compared to a resident.

Table 3.1: Public Safety Facilities Fee - Population Projections

Timeframe	Residents	Workers	Ratio of Workers/ Residents	Equivalent Resident ¹	Total Service Population ²
Total New Development (Table 1.1)	9,455	5,498	0.50	2,749	12,204
Notes:					
¹ Equivalent resident calculated by multiplying workers by ratio of workers/residents.					
² Total service population includes residents and equivalent residents.					

Facility Standards and Fee

Per capita facility standards are used in calculating the impact fee to ensure a reasonable relationship exists between new development and the need for new public safety facilities.

Appendix B lists two projects, fire station and animal impound facility expansion, in the 5-year Capital Improvement Project list that will be funded by the impact fee program. The total funded cost for these facilities is presented in **Table 3.2**. Similar to the methodology presented for Public Buildings, revenues for the projects with DA agreements were credited against the Traffic Impact Fee funding totals.

The costs associated with the future Public Safety Facilities were divided by the service population that included both residents and workers (equivalent residents) to obtain a per resident cost of \$295.19, as shown in **Table 3.2**. A weighting factor of 0.50 was applied to residential per capita costs to obtain the non-residential per capita costs. The cost per worker is \$147.59 (0.50 x \$295.19). The cost per capita was then multiplied by the density assumptions to determine a fee for each residential land use, as shown in **Table 3.3**. It should be noted that the

DEVELOPMENT IMPACT FEE STUDY - 2016 Update FINAL REPORT

Public Safety Facilities fee for the Casino uses is based on the “gaming” area rather than total building space.

Facility Costs to Accommodate Growth

Table 3.4 provides an estimate of the total revenue that will be generated for public safety facilities at build-out in 2020 and beyond. The City would maintain a reasonable relationship between new development and the use of fee revenues by funding a variety of projects to expand public safety facilities during this period.

Implementation

The public safety facilities impact fee would be collected at the time of building permit issuance. To implement the fee the City should:

- Annually update a capital improvement plan to indicate the specific use of fee revenues for facilities to accommodate growth;
- Comply with the annual and five-year reporting requirements of *Government Code 66000 et seq.*; and
- Identify appropriate inflation indexes in the fee ordinance and allow an inflation adjustment to the fee annually.

For the inflation indexes, the City should use separate indexes for land and construction costs. Calculating the land cost index may require use of a property appraiser every several years. The construction cost index can be based on the City’s recent capital project experience or taken from any reputable source, such as the *Engineering News Record* (ENR).

DEVELOPMENT IMPACT FEE STUDY - 2016 Update FINAL REPORT

Table 3.2: Public Safety Facilities Unit Costs

DEVELOPMENT IMPACT FEE STUDY - 2016 Update FINAL REPORT

Chapter 4

Transportation Facilities

This chapter presents an analysis of the need for transportation facilities to accommodate new development in the City of Marina. These include both roadway and intersection projects. A fee schedule is presented based on the cost of these facilities to ensure that new development provides adequate funding to meet its needs.

Trip Generation

Transportation facilities serve both homes and businesses citywide. Consequently, trip generation rates based on both residential and non-residential land uses reasonably represents the need for these facilities.

Different development projects impact the transportation network at different rates based on the number of primary trips generated as indicated in the Institute of Transportation Engineers (ITE) *Trip Generation Manual*, 9th Edition. The amount of daily primary trips generated by the approved and pending projects in the Traffic Impact Fee program were obtained from the Marina High School Traffic Impact Analysis (November 10, 2009), the Draft Environmental Impact Report for the Downtown Redevelopment Plan, or estimated using trip rates from ITE.

Table 4.1 presents the daily trips generated by the projects in the Traffic Impact Fee program. The projects are estimated to generate approximately 75,000 daily primary trips. These daily trip estimates are used in calculating fees for both roadways and intersections.

Transportation Projects Inventory

Appendix B contains the list of roadway and intersection improvement projects in the CIP program. The list also indicates which projects will or are expected to receive funding from other sources including FORA, TAMC, CSUMB, grants, and developers.

Table 4.2 summarizes the total roadway and intersection project costs that will be funded by the Traffic Impact Fee program, after accounting for contributions from Dunes and Marina Heights Developer Agreements. As noted in Chapter 1, the CIP list includes the funded TAMC roadway widening project on Imjin Parkway between Reservation Road and Imjin Road.

Transportation Development Impact Fee Calculations

To calculate the fee for transportation projects, the balance of the project costs (approximately \$55 million for roadways and \$13 million for intersections) were divided by the total number of trips generated in **Table 4.1** to get a cost per trip. These costs were then multiplied by the trip rates to determine the fee for each land use category, as shown in **Table 4.3**. It should be noted that the Transportation Facilities fee for the Casino uses is based on the total building space rather than “gaming” area.

DEVELOPMENT IMPACT FEE STUDY - 2016 Update FINAL REPORT

This method of calculation assures that fairness exists between new and existing development and that new development only funds expanded facilities to maintain the current level of service standards.

Transportation Fee Summary

Table 4.3 provides a summary of the impact fees for roadway and intersection projects. **Table 4.4** provides an estimate of total revenues for transportation facilities that should be generated at build-out in 2020 and beyond.

Implementation

The transportation facilities impact fee would be collected at the time of building permit issuance. To implement the fee the City should:

- Annually update a capital improvement plan to indicate the specific use of fee revenues for facilities to accommodate growth;
- Comply with the annual and five-year reporting requirements of *Government Code 66000 et seq.*; and
- Identify appropriate inflation indexes in the fee ordinance and allow an inflation adjustment to the fee annually.

For the inflation indexes, the City should use separate indexes for land and construction costs. Calculating the land cost index may require use of a property appraiser every several years. The construction cost index can be based on the City's recent capital project experience or taken from any reputable source, such as the *Engineering News Record* (ENR).

DEVELOPMENT IMPACT FEE STUDY - 2016 Update FINAL REPORT**Table 4.1: Trip Generation for Transportation Development Impact Fee**

Projects¹	Primary Daily Trips (2011 DIF Update)²	Funded Since 2011 DIF Update³	New Daily Trips

DEVELOPMENT IMPACT FEE STUDY - 2016 Update FINAL REPORT

Chapter 5

Parks Facilities

This chapter presents an analysis of the need for parks facilities to accommodate new development in the City of Marina. A fee schedule is presented based on the cost of these facilities to ensure that new development provides adequate funding to meet its needs.

Service Population

Parks facilities serve primarily residents in the City by providing space for recreation and similar programs. Consequently, a service population that only includes residents and not workers reasonably represents the need for these facilities. As population grows with new development, so does demand for recreation services provided by these facilities.

Table 5.1 shows the estimated service population for parks facilities for 2020 and beyond.

Table 5.1: Parks Facilities Fee - Population Projections

Timeframe	Residents	Total Service Population¹
Total New Development (Table 1.1)	9,455	9,455
Notes:		
¹ Only residential land uses pay park fees.		

Facility Standards and Fee

Per capita facility standards are used in calculating the impact fee to ensure a reasonable relationship exists between new development and the need for new park facilities. A per capita cost was calculated based on the estimated cost of new park facility, as shown in **Table 5.2**. This cost was then multiplied by the density assumptions to determine a fee, as shown in **Table 5.3**.

This method of calculation assures that fairness exists between new and existing development and that new development only funds expanded facilities to maintain the current level of service standards.

Facility Costs to Accommodate Growth

Table 5.4 provides an estimate of the total revenue for park facilities (neighborhood, community and green belts/open space) that will be generated at build-out in 2020 and beyond. The City would maintain a reasonable relationship between new development and the use of fee revenues by funding a variety of projects to expand park facilities during this period.

DEVELOPMENT IMPACT FEE STUDY - 2016 Update FINAL REPORT

Implementation

The parks facilities impact fee would be collected at the time of building permit issuance. To implement the fee the City should:

- Annually update a capital improvement plan to indicate the specific use of fee revenues for facilities to accommodate growth;
- Comply with the annual and five-year reporting requirements of *Government Code 66000 et seq.*; and
- Identify appropriate inflation indexes in the fee ordinance and allow an inflation adjustment to the fee annually.

For the inflation indexes, the City should use separate indexes for land and construction costs. Calculating the land cost index may require use of a property appraiser every several years. The construction cost index can be based on the City's recent capital project experience or taken from any reputable source, such as the *Engineering News Record* (ENR).

DEVELOPMENT IMPACT FEE STUDY - 2016 Update FINAL REPORT**Table 5.2: Parks Unit Costs**

Description	Service Population (Capita)	Cost	Cost per Capita
Future Park Facilities (residents)

Petitioner,

v.

BOARD OF TRUSTEES OF CALIFORNIA
STATE UNIVERSITY,

Respondents.

) **Case No. M 41781**
) **(Consolidated with M 41795)**
)

) **STIPULATION TO DISCHARGE**
) **PEREMPTORY WRIT OF**
) **MANDATE; ~~PROPOSED~~ ORDER**

) Assignment for all purposes:
) Honorable Robert O'Farrell
)

1 2. In the Fall 2008, CSUMB generated approximately 8,550 trips per day from off-
2 campus to on-campus and from on-campus to off-campus. This number was determined by a
3 combination of methodologies, including traffic tube counts and on-campus observational studies.
4 That number is the baseline traffic level against which future increases in campus traffic will be
5 measured.

6 3. In the event CSU determines, based on the CSUMB annual traffic reports, that
7 CSUMB trips will exceed the mitigation threshold of 4,361 additional trips within the upcoming
8 year, CSU will undertake further environmental review, consistent with the provisions of the
9 California Environmental Quality Act, Public Resources Code §21000 et seq., ("CEQA") to assess
10 the environmental impacts associated with such additional trips prior to exceeding said threshold.

11 4. Consistent with the Trustees resolution approving the CSUMB 2007 Campus
12 Master Plan, CSUMB will:

13 (i) Adopt a TDM plan referred to in section 1(iii) to reduce vehicle trips; report
14 annual traffic increases to the Chancellor, FORA, and Marina; and,

15 (ii) Seek approval from the Trustees to exceed the threshold of 4,361 additional
16 trips,

17 (iii) Report to the Chancellor, FORA, and Marina any measures or modifications
18 made to the TDM plan to address an increase in trip levels.

19 CSUMB's above commitment shall be construed as an enforceable mitigation measure
20 under Public Resources Code §21081.6.

21 5. Additional mitigation measure 11-5.1, adopted by the Trustees May 13, 2009, as
22 part of its approval of the 2007 CSUMB Campus Master Plan, does not preclude CSUMB from
23 making direct payments to Monterey Salinas Transit in connection with programs developed as
24 part of the TDM plan to be implemented pursuant to the MOU entered into between FORA and
25 CSU.

26 6. The Statement of Overriding Considerations ("SOC") adopted by the Trustees May
27 13, 2009 relative to its approval of the CSUMB 2007 Campus Master Plan applies to the
28 significant unavoidable impacts to: (i) on-campus roadways; (ii) off-campus transit facilities; and

1 (iii) off-campus water supply infrastructure facilities. The SOC does not apply to impacts relative
2 to off-campus traffic impacts. As previously noted, the Trustees determined that to the extent
3 CSUMB vehicle trips draw near (i.e., within 5% of) the 4,361 mitigation threshold, trip generation
4 shall be frozen below the threshold. As a result, the 2007 CSUMB Campus Master Plan will not
5 result in potentially significant impacts to off-campus roadways.

6 7. Prior to the commencement of development of Phase II of the North Campus
7 Faculty/Staff housing, CSU shall request from the Legislature through the state budget process its
8 fair-share of the costs to implement the Regional Urban Water Augmentation Project ("RUWAP"),
9 determined to be \$1,347,530. [See additional mitigation measure 7-2.2, adopted by the Trustees on
10 May 13, 2009]

11 If the Legislature denies CSU's initial funding request, CSU shall:

- 12 (i) Resubmit the request during the following CSU budget cycle, and
13 (ii) Continue to resubmit the request annually until the funding is appropriated
14 or until the Marina Coast Water District ("MCWD") commences construction of the
15 RUWAP (or its replacement project), whichever comes first.

16 If the Legislature has not funded CSUMB's \$1,347,530 fair-share costs when MCWD
17 commences construction of the RUWAP or its replacement project, CSUMB shall seek authority
18 from the Trustees to engage in discussions with representatives of FORA and Marina regarding the
19 availability of alternative funding sources, if any, for CSU's \$1,347,530 fair-share costs. CSUMB
20 may seek CSU authorization to engage in such discussions prior to the time of commencement of
21 construction of the RUWAP or its alternate project. The Parties acknowledge that the
22 determination of the availability of any such alternative funding sources shall be consistent with
23 state and federal law, the California Supreme Court's ruling in *City of Marina* and its progeny.

24 8. CSU shall request funding from the Legislature for its remaining fair-share of the
25 costs to prepare the Habitat Conservation Plan ("HCP") for the former Fort Ord. That sum is
26 expected to be \$47,800. The costs to manage the CSU Borderlands property are expected to be
27 \$4,784.91 annually. [See additional mitigation measure 8-1.1, adopted by the Trustees May 13,
28 2009].

1 If the Legislature denies CSU's initial funding request, CSU shall:

2 (i) Resubmit the request during the following CSU budget cycle, and

3 (ii) Continue to resubmit the request annually until the funding is appropriated
4 or until the HCP is completed and executed by all parties thereto, whichever comes first.

5 If the Legislature has not appropriated the funding at the time the HCP is executed, CSU
6 shall seek authority from the Trustees to engage in discussions with representatives of FORA and
7 Marina regarding the availability of alternative funding sources, if any, for CSU's one-time
8 payment of \$47,800 and its annual payments of \$4,784.91. The Parties acknowledge that the
9 determination of the availability of any such alternative funding sources shall be consistent with
10 state and federal laws, the *City of Marina* and its progeny.

11 9. The Parties request that the Court discharge the writ.

12 10. If any party or its legally recognized successor in interest contends that another
13 party has breached this Stipulation and Order, the party contending breach shall give the other
14 party/parties written notice thereof. Within thirty (30) days of delivery of such notice, the Parties
15 shall meet and confer in good faith to try to resolve the dispute. If the dispute is not resolved
16 through the meet and confer process within sixty (60) days of the initial written notice of breach,
17 the Parties shall submit the matter to non-binding mediation or some other form of non-binding
18 Alternative Dispute Resolution ("ADR"), to be agreed upon by all Parties. If the Parties are unable
19 to reach agreement on the appropriate ADR forum, the matter shall be submitted to non-binding
20 mediation. The mediator shall be selected by mutual agreement. If the dispute is not resolved
21 through ADR within nine (9) months of the initial written notice of breach, any party may file a
22 judicial proceeding in the Superior Court of California, County of Monterey, to enforce this
23 Stipulation. In that event, all parties waive discovery. The intent of the Parties in drafting this
24 provision is that any dispute arising under this Stipulation be resolved by the least expensive and
25 prompt means possible.

26 11. By executing this Stipulation, the signatories warrant that he or she has the legal
27 authority to do so.
